Launch of ICAO Implementation Packages (iPacks) to Support Member States in their COVID-19 Response, Recovery and Resilience Efforts

1. ICAO is making available a series of ‘Implementation Packages’ (‘iPacks’) as part of its support to Member States’ response, recovery and resilience efforts following the COVID-19 outbreak
2. An iPack is a bundle of standardized guidance material, training, tools and subject matter expert support which aim to facilitate and guide the implementation of the applicable ICAO provisions and recommendations by State entities (e.g. Governments, Civil Aviation Authorities and National Air Transport Facilitation Committees), aviation service providers, supply chain stakeholders and their personnel.
3. The iPack address aspects related to aviation safety, public health-related measures, facilitation, aviation security, air navigation services and air transport and economics. These packages are developed and implemented in full alignment with the measures and recommendations contained in the Council Aviation Recovery Task Force (CART) Report and its attached ‘Take off Guidance Document’. The deployment of I-packs is coordinated by ICAO’s Technical Cooperation Bureau with the support of the Air Navigation and Air Transport Bureaus, as well as the Strategic Planning, Coordination and Partnerships (SPCP) Office and the ICAO Regional Offices.
4. Member States can now access to the first two iPack, which address the following topics:
 - Strengthening National Air Transport Facilitation Committees for the Re-Start and the Resilience of Civil Aviation; and
 - Aviation Safety Risk Management related to COVID-19 for Civil Aviation Authorities.
5. For more information on the iPACKs, their content and deployment process, please visit www.icao.int/ipack or email ipack@icao.int.
